

Promotion Stripes

Stripes are to be attached to the end of the belt that does not have the manufacturer’s label sewn on. The stripe is to go completely around the belt and is to be sewn on, preferably by machine. Be sure to fold the ends under so they do not fray and please cut off the excess.

The first stripe is sewn one and one half (1.5) inches from the end of the belt. The second stripe (if applicable) one half inch from the first, and the third one half inch from the second, etc.
